No. of examination: **1511 / 02**

Mr/Mrs: **Zofia Marcowska** born: **1936** domicile: **Kraków**

Result of thyroid gland USG examination **date of examination** **11 of February 2003**

Right thyroid lobe of size 35mmx40mmx76

Left thyroid lobe: 25x20mmx62mm

Width of the isthmus about 15mm

Volume of thyroid gland is about 65ml.

The thyroid gland is enlarged within the area of both lobes. The echogram of parenchyma wholly heterogenous with evident hyperechogenic focal lesions having a hypoechogenic areola. The largest nodules of size about 30mm in the right lobe, the smaller ones about 15-20mm. The carotid arteries pushed to sides, mainly to the right. Deep cervical lymph nodes are not enlarged.

Mr/Mrs: **Zofia Marcowska** born: **1936** domicile: **Kraków**

Result of thyroid gland USG examination **date of examination** **24 of May 2005**

Right thyroid lobe of size 31mmx38mmx70mm

Left thyroid lobe: 22x20mmx68mm

Width of the isthmus about 12mm

Volume of thyroid gland is about 55ml.

The thyroid gland is enlarged within the area of both lobes. Right lobe. The echogram of parenchyma wholly heterogenous, remodelled. In the right lobe two normoechogenic nodules with hypoechogenic areola, first of about 24mm in diameter, second on the border to isthmus of size 20mmx17mm.

Within the isthmus signs of cystic degeneration. In the left lobe a few hypoechogenic solid nodules from 3mm to 6mm in diameter, furthermore in the lower part of the lobe one normoechogenic nodule with the hypoechogenic areola of 18mm in diameter.

The carotid arteries pushed to sides. Deep cervical lymph nodes are not enlarged.
